Profile

Aspiring software developer with a strong interest in human-centered technology and AI-driven solutions. I enjoy building responsive web applications using tools like React and Node.js, with a focus on clean API integration, usability, and accessibility. I'm a problem-solver by nature, comfortable taking ownership of tasks and working within teams. I value clear communication, critical thinking, and staying adaptable in fast-paced environments. With a user-centered mindset and a genuine curiosity for learning, I aim to create thoughtful digital experiences that truly meet people's needs.

Education

Bartın University (2021 - 2025)

B.Sc. in Computer Technology and Information Systems
Current GPA: 3.58/4.0

Projects

TÜBİTAK 2209-A Project: Virtual Psychologist: AI-Powered Emotional Support System for Combating Cyberbullying — eminaksu.tr
